

# TURKI ABDULLAH ANDOUS

Dhahran, Saudi Arabia | +966 554407010 | turkiquhtani@gmail.com | [LinkedIn](#)

## PROFILE

AI, Software Engineering, and Embedded Systems student at KFUPM (Class of 2027) with experience building scalable AI systems, autonomous drone technologies, embedded control systems, and production-grade software platforms. Recognized through international engineering and AI competitions including SUAS, NTU AI Exchange, and SDAIA programs. Experienced in machine learning, backend systems, computer vision, real-time systems, dashboards, and autonomous systems engineering.

## EXPERIENCE

### 180 Degrees Consulting – KFUPM Branch – Dhahran, KSA

*Project Manager / AI & Data Consultant | Aug 2025 – Present*

- Led a cross-functional consulting and engineering team delivering AI-driven operational optimization projects.
- Built predictive machine learning models using organizational datasets to forecast future business outcomes.
- Developed an AI-powered data agent enabling clients to interact with datasets and automatically generate insights.
- Designed analytics dashboards and visualization systems for executive decision-making and operational monitoring.
- Conducted market research, benchmarking, financial modeling, and data-driven strategy analysis.

### LearnKSA – Co-founder / Technical Lead

*2025 – Present*

- Architected and scaled an online learning platform serving 1,700+ students across Saudi Arabia.
- Generated 250K+ SAR in a single operating year through scalable platform engineering and automation.
- Built scalable backend systems, deployment pipelines, and content infrastructure with 99% uptime.
- Developed analytics dashboards and insight systems to monitor engagement and platform performance.

### Thaka – Co-founder / Technical Lead

*AI EdTech Startup | 2025 – Present*

- Co-founded an AI-powered edtech startup generating 10K+ SAR profit within the first month of operation.
- Built AI-generated video lesson systems for undergraduate students using generative AI pipelines.
- Developed a Retrieval-Augmented Generation (RAG) AI assistant for automated academic support.
- Designed and developed the platform website, backend infrastructure, and AI-integrated admin systems.
- Built analytics dashboards and engagement insight systems for educational performance monitoring.

### Estimadh – Dhahran, KSA

*Software Engineer & Embedded Systems Engineer – Solar Team*

- Developed embedded software systems for solar energy monitoring and real-time control infrastructure.
- Built firmware, sensor integration systems, and hardware-software communication pipelines.
- Optimized embedded infrastructure reliability, system debugging workflows, and operational performance.
- Designed monitoring dashboards and analytics systems for solar performance tracking.

### Global Students Research Conference (GSR) – Dhahran, KSA

*Head of Technology & Software Engineer | Apr 2025 – Aug 2025*

- Led development of software infrastructure supporting 3,000+ conference participants.
- Developed and deployed the official conference website and mobile application used by 1,500+ attendees.
- Built registration systems, internal management tools, and operational analytics dashboards.
- Managed and mentored a 12-member software engineering team across frontend, backend, and deployment systems.

### Student Advisory Council, KFUPM – Dhahran, KSA

*Head of Planning and Finance Committee | Feb 2025 – Oct 2025*

- Directed financial planning and policy reforms benefiting 6,000+ students across the university.
- Developed interactive analytics dashboards supporting data-driven operational and strategic decision-making.
- Built reporting and visualization systems to analyze budgeting, engagement, and organizational performance data.

## TECHNICAL PROJECTS

### UAS2030 Team – KFUPM

- Developed AI systems contributing to a first-place international victory in the SUAS autonomous systems competition.
- Generated synthetic datasets to improve machine learning model robustness and autonomous system performance.
- Built live drone monitoring and control interfaces for real-time mission oversight and intervention.
- Designed telemetry dashboards and operational analytics systems for autonomous drone monitoring.

# TURKI ABDULLAH ANDOUS

Dhahran, Saudi Arabia | +966 554407010 | turkiquhtani@gmail.com | [LinkedIn](#)

- Developed AI optimization models improving battery efficiency and motor performance.

## **Design Build Fly (DBF) Team – KFUPM**

- Programmed and built fixed-wing drone systems for aerospace engineering competitions.
- Developed motor control systems, embedded flight infrastructure, and drone stabilization systems.
- Built live telemetry dashboards to monitor and optimize flight test performance.

## **FABLAB Team – KFUPM**

- Built high-speed 3D-printed FPV drones reaching speeds exceeding 200 km/h.
- Developed motor control systems, embedded flight software, and live operational dashboards.
- Contributed to circuit design, 3D CAD modeling, system controls, and real-time flight monitoring.

## **Rocket Systems Project**

- Developed embedded control systems and software infrastructure for a rocket engineering project.
- Built live telemetry dashboards, motor control systems, and operational monitoring tools.
- Contributed to circuit design, ejection system controls, and autonomous control infrastructure.

## **EDUCATION**

### **King Fahd University of Petroleum and Minerals (KFUPM)**

B.Sc. in Computer Science & Software Engineering | Expected 2027 | MAJOR GPA: 3.83 | Cumulative GPA: 3.71

### **Texas A&M University – College Station, USA**

Incoming Exchange Student (Spring 2026)

### **National Taiwan University of Electrical Engineering (NTUEE) – Taiwan**

Visiting Student | 2023

## **FELLOWSHIPS & HONORS**

- Qimam Fellowship (2025) – Top 50 of 18,000+ applicants
- First Place – International SUAS Competition (USA, 2024)
- First Place – AI Exchange Program (Saudi Ministry of Education & NTU, 2023)
- Top Student – SDAIA & SenseTime AI Program (2022)

## **SKILLS**

Programming Languages:

Python, C++, Java, C#, SQL, JavaScript

AI & Machine Learning:

TensorFlow, OpenCV, Computer Vision, Deep Learning, Predictive Modeling, RAG Systems, Generative AI, Synthetic Data Generation, AI Agents

Software Engineering:

React, Django, Flutter, .NET Core, Backend Systems, REST APIs, Full-Stack Development, Scalable System Architecture, API Integration

Embedded Systems & Robotics:

Firmware Development, Real-Time Systems, Motor Control, Sensor Integration, Autonomous Systems, Drone Systems, Flight Control Systems, Circuit Design, Telemetry Systems

Data & Analytics:

Power BI, Dashboard Development, Data Visualization, SQL Querying, Data Analysis, Analytics Systems, Operational Insights, Performance Monitoring

Cloud, Tools & Platforms:

Git, Firebase, Google Cloud, Linux, Jupyter, Figma, CI/CD Pipelines, Deployment Systems
